

POLYSEALER LONG SERIES

HAND OPERATED HEAT SEALER

The Long series version of the Polysealer hand operated impulse heat sealer has been introduced as a simple way of sealing wider section polythene and other single webbed plastic films.

Completely portable, this machine is designed to be used on a table top and is suitable for both industrial and domestic use. This sealer has the useful feature of a low height sealing platform.

Sealing is initiated when the jaws are closed on the film with no warm up time necessary. A variable electronic timer allows the required seal time to be set relevant for the thickness of film to be sealed.

TECHNICAL SPECIFICATION

LONG SERIES POLSEALER MODELS	605
Seal Length mm	600
Seal Width mm	2
Sealable thickness	150mu (2 x 600g)
Sealing Time	0-2 seconds
Power Supply	230 volts
Power VA (Watts)	550
Weight Kg	9
