PREFECT HEAT SEALING MACHINE

PREFECT is a heavy duty manually operated Impulse heat sealing machine, designed for continuous use where there is a need for repeatable seal quality on polythene and other thermoplastic films. A compact table top sealer built to an industrial specification. PREFECT is capable of sealing heavier gauge plastic films and is recommended for use in, Ordinance, Heavy Engineering, Agriculture, Food Processing, Pre-Pack powder, etc.

PREFECT is available in two standard sizes (see below). The sealing cycle is controlled by a two-stage adjustable electronic timer to set the required heat and cool cycle times to ensuring a perfect seal every time. Controls comprise of a mains on/off switch, seal time cycle control knobs. refer to Astrapac more sophisticated models.

Operation of the machine is very simple, sealing is initiated when the jaws are closed on the film, indicator lights display the duration of sealing cycle.

This mode incorporates a manual sliding safety cutter for use (when required), for trimming bags for a neat finish or making bags from lay-flat tube.

PREFECT is supplied in power coat finish, other parts of aluminium and engineering plastics. The sealer is mounted on rubber feet.

FEATURES

- No warm up.
- Low voltage- heating elements.
- Strong Steel construction.
- Easy to use.
- Manual bag top trimmer
- Easy to Service
- Semi Portable
- Only Draws power when sealing

OPTIONS

- Film Roller Kit (for layflat Tubing as above).
- 115 Volt Version.
- Wider seals (on application)

TECHNICAL SPECIFICATION

MODEL	PREFECT	
Size	201	301
Seal Length mm	240	310
Seal Width mm	3mm Standard	
Cut Length	240	310
Sealable thickness	250mu (2 x 1000g)	
Heating time	0-2 seconds	
Cooling time	0-7 seconds	
Power Supply	230 volts	
Power VA (Watts)	250	350
Weight Kg	8	9

Bag top Trimmer in operation
